

Year 12 Design and Technology Excursion

Meriden's Year 12 Design and Technology students recently attended an excursion to an engineering and manufacturing business. Ella Bowden and Paige Kalipciyan share their experience with the School community in the following report.

Last term, Year 12 Design and Technology students were given an exciting opportunity to learn from two experienced industrial designers and mechanical engineers from Coachworks, an engineering and manufacturing business.

During the excursion, the professionals showed us a range of resources and materials. We experimented with carbon fibre, foam and resin, and we also learnt about the mechanism of train chairs and their design process.

We would like to extend a special thank you to our teacher, Miss Christiana Boutros, for coordinating this opportunity and providing us with the best possible resources ahead of starting our Major Works. We are very grateful to the team at Coachworks for facilitating this authentic learning experience. It will be invaluable when completing our Major Works.
